nov 11 2022 i know that s is a string of characters but i don t know how to use it can anyone provide me a very basic example of how its used and how it s different from char all the examples

s indicates a conversion type of string when using python s string formatting capabilities more specifically s converts a specified value to a string using the str function

what does regular expression s s do asked 13 years 2 months ago modified 4 months ago viewed 228k times

the s tag is just an abbreviation of the qualifier descriptor sarcasm by convention most people understand the whole expression without the need to spell it all out just like a tl dr or a ps etc

its nonsense is what it is lemme tell you us sarcastics have been being misunderstood just fine on our own and we was happy to take it that
s what made it funny
